The Blueprint Series:
Mastering the 'Hidden Curriculum' of College & Career Success
(Ages 12 and up)

Getting into and thriving at competitive colleges and professional workplaces takes more than good grades. It takes institutional fluency: knowing the unwritten rules, advocating for resources, and building social capital. This workshop aims to improve college retention, strengthen career readiness, and affirm students' lived experiences as a strength rather than a deficit. Students learn to move confidently through professional spaces without losing their authentic selves, as success after graduation now depends as much on networks as on degrees.
